# INTERNATIONAL AS FURTHER MATHEMATICS

(9665/FM02) Pure Maths, Statistics and Mechanics Unit FPSM1

Thursday 24 January 2019 07:00 GMT Time allowed: 1 hour 30 minutes

## Materials

- For this paper you must have the Oxford International AQA booklet of formulae and statistical tables.
- You may use a graphics calculator.

## Instructions

- Use black ink or black ball-point pen. Pencil should only be used for drawing.
- Fill in the boxes at the top of this page.
- Answer **all** questions.
- You must answer the questions in the spaces provided. Do not write outside the box on each page or on blank pages.
- If you need extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).
- Do all rough work in this book. Cross through any work you do not want to be marked.

## Information

- The marks for questions are shown in brackets.
- There are three sections to this paper.
- The maximum mark for this paper is 80. There are 40 marks for **Section A**, 20 marks for **Section B** and 20 marks for **Section C**.

## Advice

- Unless stated otherwise, you may quote formulae, without proof, from the booklet.
- Show all necessary working; otherwise marks may be lost.

<b>TOTAL</b>	

Answer **all** questions in the spaces provided.

$$\frac{dy}{dx} = \frac{1}{x^2 + y^2}$$

Give your answer to three decimal places.

**[5 marks]**

[illegible]

Answer \_\_\_\_\_

5

**2**

$$x^3 - 8x - 12 = 0$$

has a real root,  $\alpha$ , in the interval  $3 < x < 4$

Use linear interpolation to show that  $\alpha$  is in the interval  $\frac{96}{29} < x < 4$

**[5 marks]**

This image shows a single sheet of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page. There are approximately 20 lines visible. The paper has a slight shadow on the right side, suggesting it's resting on a surface.

**Turn over for the next question**

**Turn over ►**

- 3** The variables  $x$  and  $y$  are thought to be related by an equation of the form

$$y = ax^n$$

where  $a$  and  $n$  are constants.

Let  $Y = \log_{10} y$  and  $X = \log_{10} x$

- 3 (a)** Show that there is a linear relationship between  $X$  and  $Y$ .

**[3 marks]**

---

---

---

---

---

- 3 (b)** An experiment gives the following values of  $x$  and  $y$ .

$x$	2	4	6	8
$y$	19	92	232	458

Complete the table below.

$X$	0.301			
$Y$	1.28			

**[2 marks]**

- 3 (c)** On the grid below, draw a linear graph relating  $X$  and  $Y$ .

**[2 marks]**

- 3 (d)** Use your graph to find estimates for  $a$  and  $n$ .

**[4 marks]**

---

---

---

---

---

---

---

---

---

$a =$  \_\_\_\_\_

$n =$  \_\_\_\_\_

- 4 (a)** The matrix  $\mathbf{P}$  represents the transformation which maps triangle  $U$  to triangle  $V$  in the diagram below.

Write down the matrix  $\mathbf{P}$ .

[1 mark]

---

---

---

Answer \_\_\_\_\_

**4 (b)** The transformation  $R$  is a reflection in the line  $y = -x$

$R$  maps triangle  $V$  to triangle  $W$ .

Draw triangle  $W$  on the diagram below.

**[2 marks]**

Question 4 continues on the next page

Turn over ►

**4 (c)** The matrix  $\mathbf{Q}$  represents the transformation  $\mathbf{R}$ .

Find the determinant of  $\mathbf{QP}$ .

**[3 marks]**

**DO NOT WRITE ON THIS PAGE  
ANSWER IN THE SPACES PROVIDED**

**Turn over ►**

**5** The matrix **B** is defined by  $\mathbf{B} = \begin{bmatrix} -1 & 1 \\ -1 & -1 \end{bmatrix}$

The matrix **C** is defined by  $\mathbf{C} = \begin{bmatrix} 2 & 4 \\ 2 & 6 \end{bmatrix}$

The matrix **A** is such that  $\mathbf{AB} = \mathbf{C}$ .

**5 (a)** Find **A**.

**[4 marks]**

---

---

---

---

---

---

---

---

Answer \_\_\_\_\_

**5 (b)** Show that  $\mathbf{B}^4 = k\mathbf{I}$  for some integer  $k$ , where  $\mathbf{I}$  is the  $2 \times 2$  identity matrix.

**[4 marks]**

---

---

---

---

---

---

---

**5 (c)** The matrix  $\mathbf{B}$  represents a combination of an enlargement and a rotation.

**5 (c) (i)** Find the scale factor of the enlargement.

**[1 mark]**

---

---

---

---

Answer \_\_\_\_\_

**5 (c) (ii)** Find the angle of the rotation.

**[1 mark]**

---

---

---

---

Answer \_\_\_\_\_

- 7** To prepare for a tennis tournament, Holly plays practice tennis matches until she wins a match.

The results of different tennis matches are independent.

The probability that Holly wins a practice tennis match is 0.6

Let  $H$  represent the event that Holly plays more than 3 practice tennis matches.

- 7 (a)** Find  $P(H)$ .

**[1 mark]**

---

---

---

Answer \_\_\_\_\_

- 7 (b)** Let  $W$  represent the event that Holly wins the tennis tournament.

Given that  $P(W) = 0.7$  and  $P(H|W) = 0.01$ , complete the tree diagram opposite by finding the probability for each branch.

box

12

A boat is moving with a constant velocity of  $8 \text{ m s}^{-1}$  on a bearing of  $030^\circ$

A ship is moving north with a constant velocity of  $5 \text{ m s}^{-1}$

Initially the ship is 2000 metres east of the boat.

The diagram shows the initial positions and the velocities of the boat and the ship.

Find the minimum distance between the boat and the ship giving your answer to 3 significant figures.
